

PowerSchool Integration Overview

Step 1

- Find or create a PowerSchool user that can be used for the PS integration process
 - Blackboard recommends setting up a user with restricted permissions
 - Refer to the “PowerSchool Connection Info” document for more information

Step 2

- Install the configuration file that was provided by Blackboard
 - This can be installed via the Plugin Management Dashboard in PowerSchool
 - If you do not use the Plugin Management Dashboard and have an onsite server, you may need to install these files directly onto your server
 - Refer to the “PowerSchool Integration Guide” for more information

Step 3

- Schedule the extraction(s)
 - Log into Connect and visit the Admin tab, then click on the PowerSchool link
 - Refer to the “PowerSchool Integration Guide” for more information
