SafeAssign Release Notes: Feb 2014

Release Information

Launch Date: February 10, 2014

Building Block Version: SafeAssign 3.0.8 - Download the .war file.

Supported Platforms: All Blackboard Learn 9.1 Service Packs (SPs)

Requirements and Dependencies

- None

Resolved Issues

The SafeAssign 3.0.8 Building Block update contains no functional or workflow changes, and you are not required to make any changes other than upgrading your SafeAssign Building Block.

- Communication from the Learn instance to the SafeAssign service is now forced over SSL. This should eliminate mixed content warnings or issues using SafeAssign on secure Learn instances. This issue will also no longer reappear after the Learn instance fails to connect to the SafeAssign service.
