Markets and Verticals

SafeAssign is available to all markets and verticals.

Resolved Issues & Improvements

- Fixed an issue preventing users from downloading documents submitted to SafeAssign within the DirectSubmit and SafeAssignments interfaces
- Added color-coding to the list of match sources to allow easier recognition of individual matches to match sources - [Article #41194](#)
- Fixed an issue preventing some users from using the DirectSubmit feature
- Fixed an issue causing some SafeAssignments to become out-of-sync with SafeAssign - [Article #41291](#)

Default State

Enabled

Roles

- Instructors can use SafeAssign to investigate plagiarism potential in assignment submissions.
- If allowed by instructors, students can review their own work for plagiarism potential.

Managed Hosting Clients

The Blackboard Managed Hosting team will apply this Building Block on hosted Production systems currently using the April 2014 or October 2014 Release during a standard maintenance window. Customers will be contacted in a separate communication with the date and the time scheduled along with the expected impact to the hosted systems. For clients that want the update sooner they may update the Building Block via Software Updates module and create a Support case on Behind the Blackboard to schedule the recommended server restarts (to expedite the scheduling process please include a desired day and time for the restarts to begin).
