Markets and Verticals

SafeAssign is available to all markets and verticals.

Resolved Issues & Improvements

- When the Global Reference Database is enabled, the link students can see when submitting to an Assignment has been updated.

- DirectSubmit Matching column no longer shows "0%" until the SafeAssign report is returned

- The proxy settings are now functional as defined in SafeAssign configuration.

Default State

Enabled

Roles

- Instructors can use SafeAssign to investigate plagiarism potential in assignment submissions.

- If allowed by instructors, students can review their own work for plagiarism potential.

Managed Hosting Clients

The Blackboard Managed Hosting team will apply this Building Block on hosted Production systems currently using the April 2014, October 2014, Q4 2015 or Q2 2016 Release during a standard maintenance window. Customers will be contacted in a separate communication with the date and the time scheduled along with the expected impact to the hosted systems. For clients that want the update sooner they may update the Building Block via Software Updates module and create a Support case on Behind the Blackboard to schedule the recommended server restarts (to expedite the scheduling process please include a desired day and time for the restarts to begin).
