## Collaborate Ultra Resolved Issues - Nov 2015

### Featured Resolved Issue

The syncing of lips has been improved in Chrome™ browsers. Chrome browser users now see lips moving in better sync with the audio of the person speaking.

The following issues from the previous known issues have been resolved.

Resolved Issue	Status
----------------	--------

#### Display and Function Related

Moderators cannot access the menu for the last user on the participant panel.

Fixed Integration Related Blackboard 9.1 October 2014 and Learn SaaS: The Collaborate building block is missing translations when the Blackboard Learn instance language pack has been set to a language other than English. To learn more, see the [article on Behind the Blackboard](#) (available in English only).

Fixed Recording Related The first 10 to 15 seconds after a moderator starts sharing a blank whiteboard or file are not included in the recording, if the session is being recorded.

Fixed Session Administration System (SAS) Related When running a session report the owner column is left empty.

Fixed When a user deletes individual occurrences of recurring sessions and then edits the recurring sessions, the deleted occurrences reappear with the updates as well.

Fixed Guests and invitees are allows to be moderators and presenters.

Closed - Fix Not Planned WebRTC Related The syncing of lips has improved in Chrome browsers.

Fixed
