Collaborate Ultra Resolved Issues - Sept 2016

The following issues from the previous known issues have been resolved.

Resolved Issue	Status
Issues related to ARIA labels, color contrast and focus areas.	Fixed
Participants and presenters need a first time user experience tour appropriate for them.	Fixed
The number of current participants and names conveyed using the heading structure do not match. The number of participant names that are announced in JAWS as headings is greater than the number of actual participants.	Fixed
Simplifying drawing with the whiteboard pencil can be sluggish. It sometimes locks up the tab.	Fixed
JAWS is not focusing within the "Present" menu used to set away and present status. Users can't use the arrow keys to navigate through the menu. JAWS is also announcing multiple unlabeled controls when using Internet Explorer®.	Fixed
Not all buttons in the Session menu are being announced properly when using JAWS Navigation Quick Key "B".	Closed - No fix Other Quick Keys work. For example: Tab and "I".
Pass the language pack locale code from Blackboard Learn.	Fixed
Thumbnails aren't updated in the Share Content panel when switching from one PowerPoint® presentation to another.	Fixed
Repeating sessions don't appear as upcoming sessions for session owner.	Fixed
See an IO Error when running a recording query in Files Management.	Fixed
Unable to save edits to an LTI Collaborate course room. The Save button is not active.	Fixed
	Fixed

Recordings don't include when a whiteboard, PowerPoint presentation, or file have been shared.

start_recovery.sh submits the same .ctrl file multiple times to same mcu for processing.

Fixed

Lips are not syncing correctly in recordings.

Fixed

Reporting data in SAS is not consistent.

Fixed

Recording information in SAS takes an unusually long time to access.
