### What's new and improved

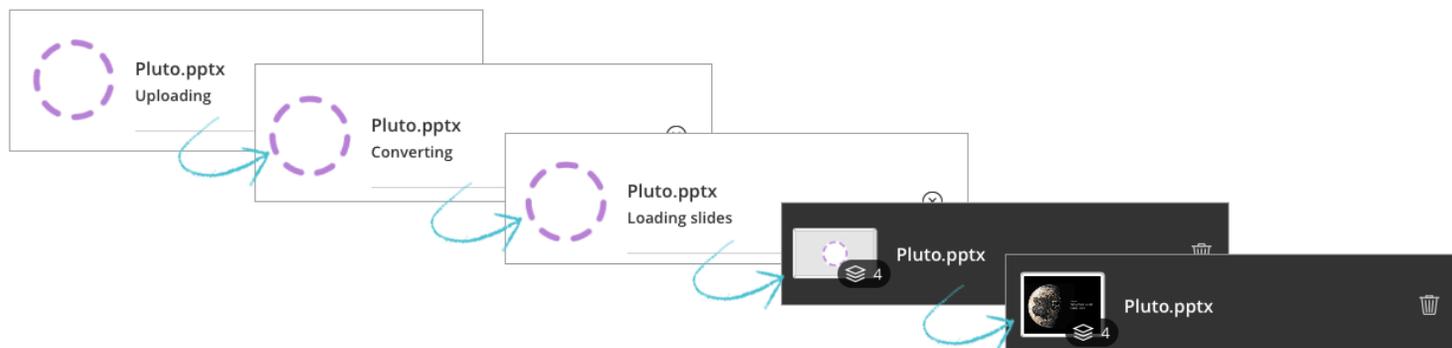

We're continually evolving to improve the teaching and learning experience. In this release we are excited to introduce persistent content!

### Load content before class, and keep it in session

Now moderators can prep for class at the beginning of the week, or even at the start of the semester.

After creating a session, moderators can open it any time and load the files they want to share. These files stay in the session until deleted by a moderator.

Collaborate shows the status of the file uploading and converting so moderators know when it's ready to share.

## What's fixed

In this release we resolved several issues reported by our third party WCAG 2.0 auditors. The most critical ones are noted in the resolved Issues list.
