Collaborate Ultra Resolved Issues - March 2017

The following issues from the previous known issues have been resolved.

Resolved Issue	Status
Accessibility improvements were made to how Collaborate treats files.	Fixed
Google Chrome users switching between breakout groups see an incorrect message saying they are having trouble connecting to the new room.	Fixed
The initial connection to a session is occasionally ending up on the timeout/reconnect state.	Fixed
If iOS user attempts to join the Blackboard app from a link that is opened on Safari Private Browsing mode, it fails to join the session.	Fixed
When searching for participants, a screen reader user is unaware that the results appear below the search. When pressing Enter, focus remains on the search field. Users may misunderstand that this feature is not working and attempt to try and re-enter the search criteria.	Fixed
JAWS announces time stamps in the recording player incorrectly.	Fixed
