

201704 release

Improvement to grade calculation

The Predict model for LMS grade calculations around missing or late assignments is improved.

Localization

Translation updates, including locale fixes for UK English and Swedish, are included in this release.

Accessibility improvements

Priority issues identified in the Q4 accessibility audit are now resolved. Additionally, a new audit and VPAT are coming soon.

Bug fixes

- Visual, style, and text on page updates include improved viewing of the filter panel, risk indicators, and student self-view.
- Fixes were made for improved interaction in filter panels and tabs.
