

201705 release

Improvements to course dashboard

Calculations in Blackboard Predict's charts were modified to improve loading of the instructor course dashboard page.

Localization

Translation work was completed for UK English, Swedish, Danish, BR Portuguese, Spanish, and Dutch.

Bug fixes

- A style fix improves readability of long text strings in the cell values in the advisor's Student List grid.
- There was a bug fix to address an issue with how the weekly prediction score displays on the Student Performance chart.
- Localization fixes were made to better fit translated text into the design.
- Visual fixes were made for easier navigation and usability.
