

201707 release

New Feature: Contextual help understanding predictions

- First time user experience: Provides instructors and advisors with a brief introduction into how the predictive modeling process works to generate risk scores for students
- Removed probability of passing score from the instructor's course activity report
- Added tool tip to explain additional details about a student's risk score
- Provided a link to an online help page for additional details about the model

Accessibility Updates

High priority student-facing accessibility issues uncovered by 3rd party audit were resolved in this release:

- Screen reader order fixed to match focus order of the page
- All form field labels made unique for clarity
- Fix to ensure implicit row header cells use the elements in student facing tables

Bug Fixes

- Fixed issue with error reports when subject line is too long
- Added confirmation message when cancelling send message
- Miscellaneous design improvements to email panel
- Student rows clickable for advisors on mobile phones
