

## 201709 release

### Enhancements

**Advisor Notes:** Enables advisors to easily keep a record of their communications, interventions, and follow-ups.

- All notes are stored chronologically for review on the student profile page.
- Emails sent via Predict from advisors to students are included in note review.
- All advisors working with the student can view stored notes and emails.

**Enhanced Course Search:** Advisors can quickly search for a specific class section by LMS Course Name or Course ID and see all the students and predictions for that class.

### Minor Enhancements:

- Added an optional filter to allow advisors to search for students by their starting term or year.
- Revised default setting in the advisor filters to display current term instead of current, recent, and future terms.

### Bug Fixes

- Fixed an issue with grade percentage not displaying for instructors on student performance section of the student details page
  - Letter grade is now configurable and can be removed from the display if preferred by an institution
- Fixed an issue to increase the display of students in large courses to 1000
- Fixed an issue causing the prediction course week number to be incorrect prior to term start
- Fixed an issue where “Yes” and “No” checkboxes weren’t clearing when clearing filters
- Minor fixes for first time user experience tooltips
