- Blackboard Open LMS' Joule 2 platform. To learn more, see the [Joule Summer 2013 Release Brief](#).

## Release Highlights

This version is a maintenance release to address bug fixes. This version is a cloud services deployment, which will appear immediately for all users.

In conjunction with this cloud services deployment, version 1.6.5 of the xpLor Connector Building Block was released through Software Updates for Blackboard Learn clients on Wednesday, September 18, 2013 at 12pm US Eastern (GMT -4). The new version of the Building Block will appear in the Software Updates module within 24 hours. The Building Block can also be downloaded [here](#).

## Resolved Issues

- XPLR-1995: Deleted xpLor quiz submissions still display
- XPLR-1984: LTI role "Teaching Assistant" does not have correct privileges in xpLor. When attempting to create a resource, the following error is displayed: "Security check for permission draft\_create failed".
- XPLR-1917: Error message when accessing new versions of a deleted resource version. Error message: "Security check for permission entity.Resource.read failed".

# Known Issues

The localization of Blackboard xpLor for languages other than US English has not been finalized. We are working to identify areas of improvement and fix issues in the coming releases. Identified known issues are added to the [Known Issues](#) list, and we welcome your feedback on issues that you may encounter. Please submit a ticket to your Client Support representative.
