- Blackboard Open LMS' Joule 2 platform. To learn more, see the [Joule Summer 2013 Release Brief](#).

Release Highlights

This version is a maintenance release to address bug fixes. This version is a cloud services deployment, which will appear immediately for all users.

Some of the main highlights of this maintenance release include:

- **Internationalization Support:** xpLor now provides full internationalization support on par with Blackboard Learn.
- **Multi-Select Removal for Standard Sets:** xpLor now allows administrators to easily remove Standard Sets from the administration page.
- **Search Enhancement:** xpLor has added the ability to search against tags by the keywords entered in the search field.
- **Institutional Admin Enhancement:** Institutional administrators can now view content created by any user in their institution.

Resolved Issues

- **XPLR-2179:** An issue was resolved where common cartridge imports were getting "stuck" in an "In Progress" state. This has been resolved.

- **XPLR-2153:** User cannot see items created under different LMS URLs; the first launch after an account merge was failing. This has been resolved.

Known Issues

Identified known issues are added to the [Known Issues](#) list, and we welcome your feedback on issues that you may encounter. Please submit a ticket to your Client Support representative.
