

Content Accordion App User Guide

The Content Accordion app is a responsive and accessible app that displays articles in a condensed way. The app allows you to manage and organize a high volume of articles and data. Each article has a title and detail. On the front-end website, a user can select a single article to expand or collapse the article detail. You can also choose to expand or collapse all article details at once.

This app is a WCM custom app that must be downloaded to use. Please contact your site administrator for additional information.

Add the Content Accordion app

Drag the Content Accordion app onto your page.

1. Type the record *Title*.
2. Type the article *Body* using the editor.
3. Select *Activate on my page* to display the article on your page.
4. On the *Duration* tab, choose your *Start Date* and *End Date*.
5. On the *Viewers* tab, select specific groups or users to view the record.
6. On the *Tags* tab, type a comma separated list of tags to associate with the record.
7. Select *Save*.

Set additional options

The screenshot shows a form titled "Set additional options" for an app named "Content Accordion". The form has four tabs: "General", "Sharing", "Sidebar", and "Tag Filtering". The "General" tab is selected. Below the tabs, there is a text input field for "App Name" containing "Content Accordion". Below that is a "Description:" label and a large text area for entering a description. A checkbox labeled "Show the app name on my page." is checked. Under "Display Settings:", there are two radio button options: "Display all active app records" (selected) and "Display a specific number of active app records". At the bottom left, there are "Save" and "Cancel" buttons.

1. Select *Options*.
2. Type an *App Name* to update the app title.
3. Type the *Description*.
4. Select *Show the app name on my page* to display the updated app name.
5. Choose your *Display Settings* for the number of posts to list.
6. Select *Save*.
